

The **Jitterbit Data Loader™ for Salesforce** gives Salesforce administrators a powerful tool for automating the import and export of data between flat files, databases and Salesforce. While scheduled data loads solve a key requirement for most Salesforce customers, many organizations have needs for deeper integration between Salesforce and their other technology investments, including bi-directional synchronization and real-time integration. The matrix below details the feature differences between Jitterbit's solutions for Salesforce.

	Jitterbit Data Loader	Jitterbit Integration Platform
Product Offering		
Use Case	Automate Batch Import/Export	Integration <i>(Migration, Bi-directional Synchronization, Replication)</i>
Pricing	Free!	Flexible Annual Subscription
Support	Web	Phone, Email, On-site
Connectivity & Data Types		
Flat Files <i>Any delimiter</i>	✓	✓
Databases <i>Any ODBC or JDBC</i>	✓	✓
Hierarchic Text Structures		✓
Salesforce to Salesforce		✓
Applications Over 250+ cloud & on-premise		✓
XML / Web Services <i>Any SOAP or REST; Hosted Web Services</i>		✓
Other <i>EDI, LDAP, POP3, SMTP</i>		✓
